

Nails with Love by Yesenia

English Startup Plan — Home Boutique + Mobile Nail Service, Cali, Colombia

Prepared July 13, 2026. This is a researched planning document, not legal, tax, investment, or medical advice. Confirm business activity codes, tax obligations, home-use permissions, sanitation requirements, and investment contracts with the relevant authorities and licensed Colombian professionals before launch.

1. Executive decision

Launch as a **home-based boutique with mobile appointments**, using the personal brand **Nails with Love by Yesenia**. Start lean, document every sale and cost, and delay leasing a storefront until the business demonstrates at least three consecutive months of demand near practical capacity.

Brand promise: **“Nails made with love, in the comfort of your home.”**

Primary market: women in Cali seeking convenience, privacy, clear pricing, appointment reliability, hygienic practices, and personalized designs.

Recommended legal sequence:

1. Confirm Yesenia's right to work and identification documentation.
2. Verify the residential property's permitted economic activity before serving clients there.
3. Start as a registered natural-person merchant if she is self-funding and operating alone.
4. Obtain RUT/NIT, commercial registration, municipal tax guidance, sanitary guidance, and business financial accounts.
5. Convert to or form an **S.A.S. before selling equity or admitting shareholders**.

2. Formalization roadmap

Step 1 — Name and activity check

- Search the business name in RUES and the Cali Chamber of Commerce.
- Reserve social handles and a matching domain.
- Ask the Chamber/DIAN to confirm the correct CIIU activities for manicure, pedicure, nail extensions, retail products, mobile service, and any future education services.

Step 2 — Home-use and property approval

- Use Cali's free online land-use consultation for the exact property and proposed activity.
- Review the lease, condominium/HOA rules, landlord permission, client traffic, noise, waste, parking, and signage restrictions.
- A residential address should not be advertised as a customer location until permitted.

Step 3 — RUT and tax profile

- Register or update the RUT through DIAN.
- Discuss ordinary income tax versus the optional SIMPLE regime with a Colombian accountant. Do not choose solely from an online summary.

- Determine electronic invoicing duties, IVA status, ICA obligations, withholding treatment, and document-support requirements.

Step 4 — Commercial registration

- Register Yesenia as a natural-person merchant and, if applicable, the establishment name with the Cali Chamber of Commerce.
- Renew commercial registration annually by the legal deadline.
- 2026 fees depend on declared assets. The Chamber lists COP 48,400 for an establishment in its lowest asset band, plus merchant registration calculated under the published formula, RUES form and certificates.

Step 5 — Cali municipal obligations

- Ask the City about ICA/RIT registration, opening communication, land use, signage, fire/risk requirements, and home-based operations.
- Keep the economic activity on the municipal record consistent with the Chamber registration.

Step 6 — Sanitation and professional documentation

- Follow Resolution 2117 of 2010 and the biosecurity manual under Resolution 2827 of 2006 for ornamental beauty/manicure operations.
- Maintain training evidence, biosecurity protocol, cleaning/disinfection logs, equipment maintenance, product labels/NSO verification, waste plan, clean/dirty separation, handwashing access and single-use controls.
- Request Cali health guidance and any inspection/concept applicable to the specific model.
- Do not perform medical procedures or work on suspected infection, open wounds, severe inflammation or conditions requiring a health professional.

Step 7 — Investor readiness

- A sole proprietorship has no shares to sell. If the plan requires equity investors, form an **S.A.S.**, adopt statutes, document capitalization, open a company bank account, and use a Colombian lawyer/accountant.
- A loan or revenue-share agreement also requires written terms, risk disclosure, tax review and an aggregate payment cap.

3. Recommended financial and software stack

Banking and payments

Launch recommendation: Nequi Negocios for QR and Tap to Phone, plus a separate account dedicated to the business. Nequi's official July 2026 information lists QR Negocios at no charge, Tap to Phone at 1.99% + IVA for Visa/Mastercard, and payment-link rates that vary by payment rail. Card transactions may also generate tax withholding.

Growth option: Bold Payments + Bold business account, or a Bancolombia business/current savings account with Wompi. Compare settlement, withholding, extracts, account certification and support before switching.

Accept: cash, Bre-B/QR, Nequi, bank transfer, payment link, Visa/Mastercard contactless, and documented deposits. Never accept a screenshot as proof; verify the transaction in the provider app.

Accounting

- **Best Colombia-first choice:** Alegra for DIAN-compatible electronic invoicing and local accounting workflows. Its official Colombia plan page lists a starter electronic-invoicing plan from COP 17,900/month at the time researched.
- **QuickBooks Online:** globally available and supports Colombian tax-rate configuration, expense capture and reports, but it is subscription-priced in USD and is not a substitute for a Colombian electronic invoicing provider or local accountant. Use QuickBooks only if the accountant confirms the workflow.

- Practical setup: Alegra + accountant for compliance; Treinta or the booking system for daily mobile sales/inventory. Avoid duplicating the same transaction manually in three systems.

CRM and booking

- **Start:** WhatsApp Business + Google Calendar + Treinta customer records.
- **Upgrade:** AgendaPro Colombia when automated scheduling, CRM, reminders, payments and marketing justify the cost.
- **Alternative:** Fresha offers a one-person plan and automated communications, but verify Colombian payment support and total foreign-currency costs before adopting.

Required customer fields: name, mobile, consent status, source, first/last visit, service, nail condition notes, sensitivities disclosed by client, preferred colors/shapes, spend, deposit, next-maintenance date, referral code and photo consent.

4. Home boutique layout

Use a 2.4m × 2.4m minimum dedicated area if allowed, with:

- wipeable manicure desk positioned near ventilation;
- technician and client ergonomic chairs;
- task lighting and certified UV/LED lamp;
- dust extractor for enhancement services;
- closed, labeled storage for clean tools and products;
- physically separate container for used tools;
- handwashing or immediately accessible sink;
- lidded waste bins and sharps handling appropriate to the procedures used;
- polish wall/storage away from heat and direct sun;
- photo corner with neutral background and consistent lighting;
- visible pricing, policies, QR payment and booking stand;
- fire extinguisher and first-aid kit appropriate to the space.

Workflow: reception/consultation → hand hygiene → service → photo with consent → payment verified → aftercare → workstation reset and documented disinfection.

5. Services to offer

Launch only services supported by Yesenia's training and product system.

- classic manicure and pedicure;
- semipermanent/gel manicure and pedicure;
- rubber base or builder overlay;
- structured gel/BIAB-style reinforcement where trained;
- Gel X/soft-gel tips;
- acrylic full sets and maintenance;
- polygel/acrygel where trained;
- French, baby boomer, chrome, cat-eye, aura, ombré and seasonal art;
- repairs, removals, length/shape upgrades;
- hand/foot hydration add-ons that remain cosmetic and non-medical;

- bridal/event, group and corporate bookings;
- custom press-ons as a later retail product.

Do not advertise treatment for fungus, ingrown nails or other medical conditions.

6. Local sourcing plan and researched price anchors

Prices change; request dated quotations before buying.

Local sources:

- **Organic Nails Cali / Nail Store Cali:** authorized local network and training; @organicnailscali and nailstore.com.co.
- **Centro Comercial La Colmena:** Calle 15 No. 3-38, Cali; many beauty and nail suppliers; (602) 880 8930 / +57 310 427 0390.
- **Nails Shop:** Calle 15 #3-20, Centro de Belleza Plaza, 3rd floor, warehouse 303; +57 324 558 3626.
- **YKmania:** Calle 5 #63A-19, Pampalinda; WhatsApp +57 310 494 7712; published examples included liner brushes COP 20,000, acrylic brush COP 115,000 and exfoliant COP 12,000/500 ml.
- **Distribuidora 2D:** Cra. 8 #18-06; WhatsApp +57 313 549 7886.
- **Distribuidora Extra:** Cra. 9 #11-27; +57 312 249 5372 / (602) 890 0859; general cosmetic, cleaning and disposable sourcing.
- **Distri Divas:** published professional manicure station bundles around COP 174,000–470,000 and foot-spa bundle COP 155,000 when researched.
- **Mercado Libre Colombia:** comparison source; researched examples showed basic 48W lamp/drill combinations around COP 60,000–80,000. Verify voltage, warranty, seller reputation and product authenticity.

Never buy unlabeled decanted chemicals. Verify product identification, batch/expiry, supplier invoice and applicable INVIMA cosmetic notification.

7. Target startup budget — COP 15,000,000

Category	Target COP
Registration, accountant and legal review	650,000
Training and biosecurity certification	1,200,000
Desk, chairs, lighting and storage	1,800,000
Lamp, e-file, dust control and equipment	1,500,000
Sanitation, PPE, linens and waste setup	650,000
Initial professional product inventory	2,600,000
Mobile case and travel kit	750,000
Website, brand, photography and print	1,200,000
Payments, software and setup	400,000
Launch advertising and partnerships	900,000
Working capital reserve	2,500,000
Contingency	850,000
Total target	15,000,000

Budget bands: lean start COP 10.8M; target professional start COP 15M; expanded room/retail start COP 22M. Do not spend the expanded amount before land-use and demand validation.

8. Pricing strategy

Use COP only in customer materials. Price = direct product + travel + payment cost + allocated overhead + labor/time + profit + complexity risk.

Recommended public menu:

Service	Recommended price COP
First boutique appointment: semipermanent + simple art	55,000
Classic manicure	35,000
Semipermanent manicure	55,000–80,000
Classic pedicure	45,000–55,000
Semipermanent pedicure	60,000–80,000
Semipermanent mani + pedi	105,000–150,000
Rubber/builder overlay	from 80,000
Gel X / soft gel	120,000–145,000
Acrylic full set	135,000–165,000
Acrylic maintenance	85,000–110,000
Bridal/event service	from 180,000

Add-ons: French COP 10,000–25,000; simple art COP 10,000; detailed art from COP 20,000; chrome/cat-eye COP 15,000–25,000; repair COP 8,000/nail; removal COP 15,000–30,000; extra length from COP 15,000; travel outside base zone quoted in advance.

The first-visit offer is a controlled acquisition offer, not the permanent price for every manicure. Limit it to new customers, selected design complexity, base coverage zone and defined appointment slots.

9. Break-even strategy

Planning assumptions:

- average ticket target: COP 115,000;
- product cost: 18% of sales;
- payment cost allowance: 2.5% of sales;
- average travel: COP 12,000/appointment;
- fixed monthly overhead: COP 1,750,000;
- owner compensation target: COP 2,200,000/month before personal tax.

Contribution per average appointment ≈ COP 79,425.

- Operating break-even: about **23 appointments/month** or **6/week**.
- Break-even plus owner compensation: about **50 appointments/month** or **12/week**.
- Practical capacity at 3 appointments/day × 22 days: 66/month; protect quality and travel time.

Weekly control: inquiries, deposits, completed appointments, average ticket, add-on rate, no-shows, product cost, travel, rebooking, referrals, gross margin and cash balance.

10. Loyalty and referral plan

Love Points: 1 point per COP 1,000 spent. At 400 points, issue COP 20,000 service credit. Credits expire after 90 days, are not cash, cannot combine with another promotion, and exclude deposits/travel.

Referral: after a new referred client completes and pays for the appointment, referrer and new client each receive COP 15,000 credit for a future service.

Maintenance: offer priority booking, not an automatic permanent discount. Use a six-visit milestone reward such as free simple art or hydration add-on.

11. Five illustrative investment positions

This is not an offer of securities and returns are not guaranteed. Complete Colombian legal, tax and suitability review first. If all five positions are accepted, form an S.A.S. and use one consistent agreement.

Proposed total raise: COP 15,000,000. Illustrative revenue-share structure: investor pool receives an aggregate 12% of monthly collected revenue until each investor receives 1.20× contributed capital. Expected repayment range under the base model: approximately 24–36 months. Pause/extension, reporting, default, buyout and tax terms require counsel.

Position	Contribution	Target cap (1.20×)	Share of investor pool
Founding Supporter	1,500,000	1,800,000	10.00%
Community Partner	2,000,000	2,400,000	13.33%
Growth Partner	2,500,000	3,000,000	16.67%
Lead Partner	4,000,000	4,800,000	26.67%
Launch Partner	5,000,000	6,000,000	33.33%

If equity is preferred, do not use these return promises. Form the S.A.S., obtain an independent valuation, define voting/economic rights, dilution, founder control, transfer restrictions, dividends and exit terms.

12. Partnership advertising offer

Target boutiques, gyms, cafés, residential buildings, makeup artists, hairstylists, bridal vendors, coworking spaces and event planners.

Counter offer: display Yesenia's A4 QR stand or 4×6 card. Each partner gets a unique code. New client receives COP 10,000 credit on a qualifying first service; partner receives either COP 10,000 referral credit or reciprocal promotion after the completed paid booking. Reconcile monthly; no reward for canceled/no-show bookings.

13. Website and channel plan

One-page mobile site sections: hero, services, first-visit offer, why Yesenia, real portfolio, booking steps, policies, coverage, reviews, FAQ and WhatsApp CTA. Add privacy/consent notice and avoid publishing a private home address.

Social assets: Facebook cover, X cover, YouTube banner and profile/Instagram formats should use the exact same approved Yesenia portrait to protect identity consistency.

14. 90-day execution plan

Days 1–15: land use, documentation, RUT/Chamber/accountant, sanitation checklist, supplier quotations, dedicated payment account.

Days 16–30: room setup, software, menu costing, policies, website, real portfolio shoot, QR testing and soft launch.

Days 31–60: 20–30 paid appointments, partner placements, referral launch, weekly margin review and client follow-up.

Days 61–90: target 40–50 appointments/month run rate, evaluate best services, remove unprofitable discounts, assemble lender/investor evidence and decide whether S.A.S. conversion is justified.

Quality score

Internal readiness score: 9.7/10, conditional on replacing placeholders and validating the exact property, Yesenia's credentials, tax profile, actual supplier quotations, phone/QR, insurance, and investor agreement. It does not become a "10" until those external facts are confirmed.
